■ GitHub: github.com/Dilli57
■ India

■ Objective

Aspiring Data Scientist with strong analytical skills and passion for data analysis, machine learning, and data visualization. Seeking an opportunity to apply my knowledge in a dynamic environment and contribute to solving real-world problems.

■ Education

Bachelor of Technology in Electrical and Electronics Engineering
Siddharth Institute of Engineering and Technology, Puttur, Andhra Pradesh | Graduation Year: 2025

■ Skills

Programming Languages: Python, R
Data Analysis: Pandas, NumPy
Data Visualization: Matplotlib, Seaborn, Power BI
Machine Learning: Scikit-learn
Database: SQL
Tools: Jupyter Notebook, Git, Excel

■ Projects

1. Titanic Data Analysis
 - Analyzed Titanic dataset to predict survival using Python, Pandas, and Matplotlib.
 - Performed data cleaning, visualization, and applied basic ML models.
2. Iris Flower Classification
 - Built a classification model using Scikit-learn.
 - Visualized data trends and model performance.

■ Certifications

Data Science Fundamentals
Machine Learning Basics

■ Achievements

- Completed 5+ projects on Data Science
- Actively contributing to GitHub open-source projects

■ Declaration

I hereby declare that the above-mentioned information is true to the best of my knowledge.
